INVITATION: WEBINAR (free of charge)

Fuel poverty and energy savings consultation for private households - Lessons learnt around Europe

Economic disequilibria and diverging social conditions of private households bear a huge challenge to a socially fair design of the energy supply in Europe and its member states. Future European energy and climate policy needs to take into account the great differences of starting points in the member states. Information and consultation especially for vulnerable consumers turn out to offer part of the solution. This can be shown by the experiences and results of the IEE-funded project EC-LINC. At the same time policy solutions are discussed on European level.
When: Tuesday, Feb 11, 2014

14:00 PM - 16:00 PM

Where: Internet*

Agenda:

14:00 PM	Introduction
